

ILG aids innovation

Innovation Law Group Ltd. of Sequim assists in the preparation, filing and prosecution of patent applications and in international patent and trademark protection. ILG has assisted recently in the following:

- Camaraderie Cellars of Port Angeles has had its new compound wine barrel bung (stopper) adopted by the world's largest barrel manufacturer, Sequin Moreau, as a promotion for all of Europe. It also is used by American wineries, including Walla Walla and Napa Valley.

- U.S. Patent 8,054,160 has been issued to area businessman Anthony Corrado for a system extending the battery life of multi-modal RFID tags used in inventory control and person-tracking systems.

- The U.S. Patent Office issued U.S. Patent 8,055,692 to Dr. Bruce L. Horn for a software application to show the changing path of a search.

- The U.S. Patent Office has issued U.S. Patent 8,039,289 to TP Solar Inc. on an energy-efficient solar cell wafer transport that reduces solar cell processing energy requirements. ILG assisted TP Solar Inc. with several U.S. and foreign patents on the system.
