

Innovation Law Group Ltd. is pleased to announce that the US Patent Office has granted US Patent 7,398,889 to local inventor John M. McNulty of Sequim, WA. John's patent covers rotatable barrel storage units made from new or reconditioned wood stave barrels having storage shelving, drawers, wine racks and lazy susans fitted into the interior and accessible from one side. The barrel is mounted on end on a rotatable platform that is hidden by the barrel lip, yet it holds the barrel off the ground enough to permit easy rotation, even when placed on carpeting. The McNulty barrel storage units are on display at Olympic Cellars and at the ILG Office in Sequim. If you are interested in purchasing a barrel storage unit, please contact Mr. McNulty at 582-3838. Innovation Law Group assisted John in the drafting, filing and prosecution of the patent. Innovation Law Group is located at 237 North Sequim Avenue, Sequim, and can be reached at 681-7305.
