Patent issued 4-18-06
PDN

SEQUIM — Innovation Law Group announced the issuance of the Patent No. 6,978,590 to inventor John Graham of Sequim.

Graham's patent keeps the underdeck of mowers clean by use of an improved mower blade that has a row of upward-projecting plastic fingers, which repeatedly sweep the underside of the deck free of grass clippings as the blade rotates.

Innovation Law Group assisted Graham in dealing with the U.S. Patent and Trademark Office, successfully obtaining claims on both the mower blade with the fingers, and replaceable fingers.

Graham is exploring licensing and manufacturing alternatives.

Innovation Law Group is at 237 N. Sequim Ave. and can be reached at 360-681-7305. More information about the law firm can be obtained on the Internet at www.innovatinlaw.com.
