Vial Assembly and Method for Reducing Hospital Acquired Infections

Innovation Law Group, Ltd. of Sequim is pleased to announce that the US Patent Office has just issued a second US Patent to local inventor, Dr. Marion E. Yandell, MD.

Dr. Yandell's second invention, covered by US. Patent 7,789,871, is directed to a medicinal vial assembly for reducing the incidence of infections acquired in hospitals. The vial includes a vacuum-break device having an internal bladder that expands as medicinal fluid is withdrawn by hypodermic needle. Dr. Yandell's vial does not require pre-pressurization. The hypodermic needle is simply inserted in the vial through the stopper and the medicinal fluid withdrawn. Thus, no microbes carried in ambient air are introduced into the medicine.

Dr. Yandell is actively seeking strategic commercialization partners on his patented invention. The two patents cover variations in his vial system. He has several other related US and foreign patents pending. Dr. Yandell can be contacted at 360-452-1171.

ILG assisted Dr. Yandell in the preparation, filing and prosecution of the US and foreign patent applications. ILG is the premier patent and trademark firm on the Olympic Peninsula, offering over 40 years experience in all phases of Intellectual Property and related business counseling from its Sequim office. ILG can be reached at 360-681-7305 or www.InnovationLaw.com.
